What “connect your devices” means

The Free tier lets you manage the files that are stored locally on whichever device you're using. Pro unlocks the part that makes FILOTRON a fleet: securely connecting your devices to one another so you can reach, browse and move files between them, directly and remotely.

Your device limit

An annual subscription lets you connect up to 20 devices to your personal fleet; the lifetime plan raises that to 50. You can remove a device at any time to free up a slot.

Billing & the small print

Currency

All prices are in US dollars (USD). Local taxes (e.g. VAT/GST) may be added at checkout and are shown before you pay.

Where you buy

On iOS & macOS via the Apple App Store; on Android via Google Play; on Windows & Linux via our payment provider, Paddle.

Auto-renewal

The annual subscription renews automatically at the end of each year until you cancel. The lifetime plan is a single payment and does not renew.

Cancelling

Manage or cancel a subscription in your Apple account, Google Play account, or via Paddle, wherever you bought it. Cancelling stops future renewals.

Free trial

There is no free trial for the Pro connectivity features.

Refunds
